

Naval Expeditionary Combat Readiness Center

ECRC Capabilities

The Expeditionary Combat Readiness Center (ECRC) mobilizes Navy Reserve Sailors, provides support to Navy individual augmenters (IAs) and ad-hoc units employed in or in support of overseas contingency operations. ECRC is the administrative parent command for IA Sailors with global support assignment orders.

RESPONSIBILITIES

Closely interfaces with Navy component commanders about deployed IAs and their required support

Coordinates logistic support and training requirements for IA Sailors going through the deployment and redeployment process

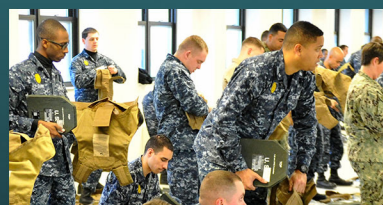

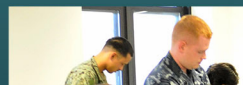

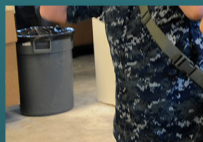

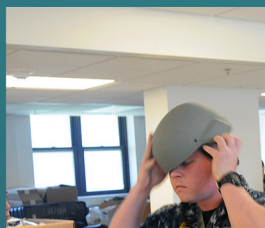

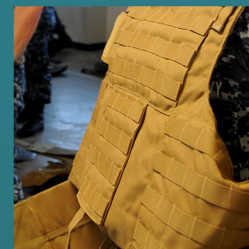

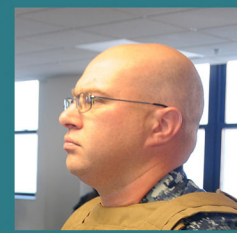

Provides strategic support to mobilize the Navy Reserve during national crisis

Provides Navy Liaison Officer teams to Army training sites to coordinate with Army trainers and support staff

Assigns action officers to individual augmenter mission groups

Provides operational stress control training at the Warrior Transition Program

Provides Reception, Staging, Onward Movement and Integration (RSOI) to support individual augmentees in the Central Command area of operations

Supporting Sailors and Their Families

ECRC at a Glance

ECRC provides processing, equipping, training, and proactive family support to Active and Reserve Individual Augmentees and provisional units throughout all deployment phases in support of Combatant Commander requirements, contingency operations, or national crisis.
